

Trade fair review: “Laser Korea”, “Espace Laser”, “ECOC” and “Medtec Ireland”

In the past months, CeramOptec was present at some trade fairs as exhibitor or visitor to look for business partners and to maintaining contacts and learn about the latest trends.

At the “**Laser Korea 2017**” from **12 - 14 July 2017**, CeramOptec shared a stand with UniOTech corp., at which, alongside different fibres, the UVNSS and UVNCC cables were presented. “**Laser Korea**” is the largest international trade fair in Korea and was held for the eighth time.

CeramOptec Business Meeting at Laser Korea 2017

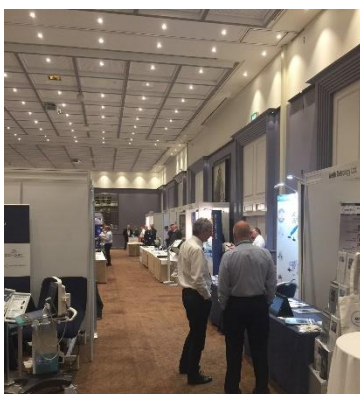

Entrance to the Espace Laser in Strasbourg

“**Espace Laser**” took place from **12 - 14 September 2017** in **Strasbourg, France**, and was followed immediately by the “**ECOC 2017**” in **Gothenburg, Sweden**, from **17 - 21 September 2017**.

CeramOptec was present at both trade fairs as a visitor and, alongside several meetings, learned about the latest developments in the field of laser machines, robots and monitoring methods. These fields, among others, form the focus of “**Espace Laser**”. The “**ECOC 2017**”, on the other hand, is characterised by optical communication and is the largest trade fair in Europe in this specialist field.

October began with the “**Medtec Ireland**” in **Galway, Ireland**, from **4 - 5 October 2017** and provided a great deal of information in the field of medical technology. “**Medtec Ireland**” is a trade fair steeped in tradition which only concerns itself with Medical Design and manufacturing. Medical technology is a very important industry for CeramOptec. Since the trade fair was able to record a high attendance figure at 700, the visit was a complete success.

Visitors at the Medtec Ireland 2017

Entrance area to the ECOC in Gothenburg

CeramOptec will visit other trade fairs by the end of the year, such as the “**fmb**” in Bad Salzuflen from **8 - 10 November 2017**, the “**Productronica**” in Munich from **14 - 17 November 2017** and the “**Formnext**” in Frankfurt on the same dates. In cooperation with parent group biolitec®, CeramOptec will be represented with a stand at the “**Medica**” in Düsseldorf from **13 - 16 November 2017**.
